

# WHY IS FIBERGLASS BETTER?

## LIGHTWEIGHT, INSULATED SHELTERS THAT PERFORM IN ANY ENVIRONMENT

Shelter Works manufactures custom-engineered fiberglass shelters that protect the country's critical field equipment. As an American based manufacturer with over 40 years of experience in designing and manufacturing fiberglass shelters, we take great pride in the quality and durability of our buildings.

### FIBERGLASS SHELTER BENEFITS

- **MAINTENANCE FREE** - A molded fiberglass shelter will last for decades exposed to the harshest elements without any noticeable deterioration. The gel coat may eventually fade but the FRP composite will remain as strong as the day it was delivered.
- **LOWEST LIFETIME COST OF OWNERSHIP** - Because you don't have to paint, repair or replace it, there is no costly maintenance. The shelter pays for itself many times over during its long and useful life.
- **EASY TO INSTALL** - The shelter arrives fully assembled and ready to set in place using common construction site equipment.
- **ENERGY EFFICIENT** - Shelter Works' unique manufacturing process creates continuous insulation throughout the walls and roof with no thermal bridges. The foam insulation, encapsulated within and protected by the fiberglass, will retain its insulation properties for the life of the shelter.
- **PERFORMS IN ANY ENVIRONMENT** - The durability of a Shelter Works enclosure remains unchanged, even in extreme temperatures, hurricane winds, Alaskan snow loads, and coastal climates. Fiberglass can easily withstand humidity, chemical exposure, and other corrosive environments.
- **CUSTOMIZABLE** - Every shelter is engineered to order.
